The X400 is the little brother of the World's First Belt Grinder designed for sharpening mower blades the Model 760. The X400 was specifically designed for lower volume shops and commercial mowers that still wanted to take advantage of the extraordinary speed and superb sharpening that the 760 offers but don't need the extra horsepower or longer belt length. The X400 will save you time and money over your current sharpening system. Don't you think its time to get out of the stone age, try a Burr King today!
